Safety and Warranty for Wireless Models of Vigor Routers

Safety	<ul style="list-style-type: none"> ● Read the installation guide thoroughly before you set up the router. ● The router is a complicated electronic unit that may be repaired only by authorized and qualified personnel. Do not try to open or repair the router yourself.
	<ul style="list-style-type: none"> ● Do not place the router in a damp or humid place, e.g. a bathroom. ● Do not stack the routers.
Instructions	<ul style="list-style-type: none"> ● The router should be used in a sheltered area, within a temperature range of 5 to +40 Celsius. ● Do not expose the router to direct sunlight or other heat sources. The housing and electronic components may be damaged by direct sunlight or heat sources. ● Do not deploy the cable for LAN connection outdoor to prevent electronic shock hazards. ● Do not power off the router when saving configurations or firmware upgrades. It may damage the data in a flash. Please disconnect the Internet connection on the router before powering it off when a TR-069/ ACS server manages the router. ● Keep the package out of reach of children. ● When you want to dispose of the router, please follow local regulations on conservation of the environment.
	<p>We warrant to the original end user (purchaser) that the router will be free from any defects in workmanship or materials for a period of two (2) years from the date of purchase from a DrayTek authorized dealer in the UK/Ireland. Please keep your purchase receipt in a safe place as it serves as proof of date of purchase. During the warranty period, and upon proof of purchase, should the product have indications of failure due to faulty workmanship and/or materials, we will, at our discretion, repair or replace the defective products or components, without charge for either parts or labour, to whatever extent we deem necessary to restore the product to proper operating condition. Any replacement will consist of a new or re-manufactured functionally equivalent product of equal value, and will be offered solely at our discretion. This warranty will not apply if the product is modified, misused, tampered with, damaged by external factors, used with unapproved accessories or subjected to abnormal working conditions. Warranty applies to hardware only, not software or firmware. Defects which do not significantly affect the usability of the product will not be covered by the warranty. We reserve the right to revise the manual and online documentation and to make changes from time to time in the contents hereof without obligation to notify any person of such revision or changes.</p>

(*1: for 2.4GHz WLAN model; *2: for 5GHz WLAN model; *3: for LTE model; *4: for 5G-NR model)

This product is designed for 5G-NR, LTE, DSL and 2.4GHz /5GHz WLAN network throughout the EC region.

Hardware Installation

1. Connect the DSL interface to the land line jack with a DSL line cable, or Connect the cable Modem/DSL Modem/Media Converter to the WAN port of router with Ethernet cable (RJ-45).
2. Connect one end of an Ethernet cable (RJ-45) to one of the LAN ports of the router and the other end of the cable (RJ-45) into the Ethernet port on your computer.
3. Connect one end of the power adapter to the router's power port on the rear panel, and the other side into a wall outlet.
4. Power on the device by pressing down the power switch on the rear panel.
5. The system starts to initiate. After completing the system test, the ACT LED will light up and start blinking.

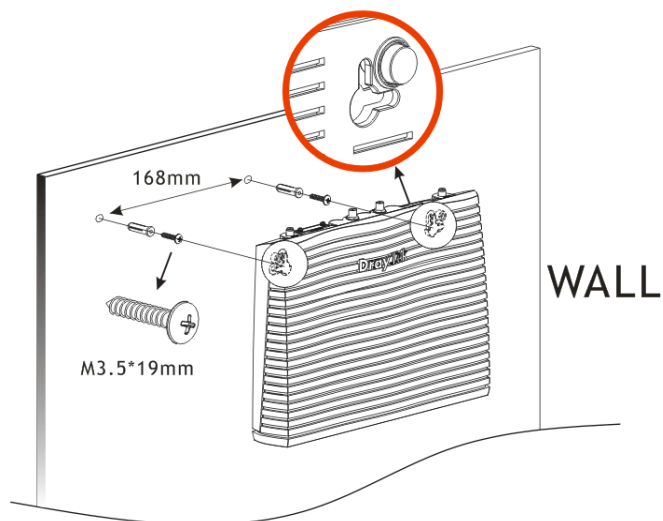

Wall-Mounted Installation

Vigor router has keyhole type mounting slots on the underside.

1. Drill two holes on the wall. The distance between the holes shall be 168mm.
2. Fit screws into the wall using the appropriate type of wall plug.

Note	The recommended drill diameter shall be 6.5mm (1/4").
-------------	---

3. When you finished about procedure, the router has been mounted on the wall firmly.

Antenna Installation

In this section, we take Vigor2866Lac as an example. There are two types of antennas provided for Vigor2865Lac, which must be installed in different locations carefully and correctly. Wrong installation might cause bad signal of wireless connection. Therefore, pay attention to the installation of antennas by referring to the following illustration.

Magnetic antenna must be installed on the extension base before connecting to Vigor router.

The number of antennas used for RF models will vary based on your model. For detailed information, refer to www.draytek.com.

Follow the steps below for installing the SIM card (for L model) into the card slot:

1. Assemble the extension base with the antenna.
2. While installing the SIM card into the card slot, note that the back plate of the SIM card slot must be removed first.
3. Assemble the SIM1 and SIM2 with the card cassette. Later insert the cassette into the SIM card slot and the direction of card notch must be on the left side.

Software Configuration

Make sure your PC connects to the router correctly.

Open a web browser on your PC and type <http://192.168.1.1>. A pop-up window will open to ask for username and password. Please enter "admin/admin" as the Username/Password and click Login.

Then, the Main Screen will pop up.
